## SERVICES OVERVIEW

### Unleashing the Power of American IT

PlanetMagpie provides IT consulting services to small and mid-market businesses across the United States. Our services encompass all four “pillars” of business IT, allowing you to partner with a single provider for all of your IT needs.

#### The Four Pillars of IT

**IT Consulting:** From upgrading and securing corporate networks to implementing the latest Microsoft solutions, our IT Consultants are the big dogs. Specializing in Microsoft-centric environments, we deploy Microsoft 365, Teams Voice, Exchange Server, Windows Server, and a full range of IT solutions for our customers.

**IT Support:** With a custom IT support plan for each customer, our IT Support team proactively handles network maintenance and onsite/remote helpdesk support for your end users. With a focus on maximum uptime, PlanetMagpie IT Support is a cost-effective and highly-trained alternative or supplement to in-house IT staff.

**Cloud Services:** We deliver private cloud services on the industry's highest-quality servers and network equipment, out of our datacenter in Silicon Valley. Host your Microsoft solutions on our private clouds. Run web applications and host websites, cloud backups, and file shares.

**Digital Marketing:** Our award-winning team will design your one-of-a-kind website and then help promote it online so you can reach and convert your target audience. Our web development solutions include Sitefinity, Craft, and WordPress, three ecommerce platforms, and custom application development.

Call PlanetMagpie today and turn your IT into your competitive advantage!

#### What Sets PlanetMagpie Apart from Other IT Consulting Agencies?

- **Microsoft Experts.** We have been an elite Microsoft Partner for over 20 years. Our engineers and technicians have been certified in many Microsoft solutions over the years, including Microsoft 365, Communications, and Small and Mid-Market Cloud Solutions.
- **Cybersecurity Centric.** We only recommend and implement IT solutions that can be highly secured. Security is an everyday battle that we fight for you.
- **Datacenter Experts.** We have managed our own private datacenter since 1998, and even created one of the very first clouds. As a result, we understand datacenter operations and cybersecurity in ways that other IT Consultants can't.
- **Award-Winning Web Design.** Our Creative Lab has won more than 24 WebAwards for its website designs. We also offer premier brand design services, whether you need an aspirational image or one that reflects your earned success.
- **Made in America.** We are dedicated to developing the U.S. IT workforce and buying American-made IT products whenever possible. By hiring PlanetMagpie, you are investing in America.
