

VIRTUAL OFFICE HOSTING

Run an Office – Or Your Entire Company – Through PlanetMagpie's Hosted Virtual Office

Hosting your company's IT infrastructure on servers in an offsite datacenter, as opposed to your office ("hosted software/cloud computing") is very new. But nowadays, thanks to faster broadband and virtualization technology, you can host an entire office worth of software and data remotely. File/print servers, email, even voice communication. All for a single monthly rate.

PlanetMagpie provides multiple Microsoft-based software packages as part of our Virtual Office Hosting. We build your company's software infrastructure to support your business needs – without installing a single server on-site.

FEATURES

- » **Hosted Small Business Server 2008:** the power of a big business in a small box (includes Exchange 2007 and SharePoint)
- » **Hosted Windows Server 2008:** a more robust version of SBS 2008, for companies over 25 employees
- » **Hosted Office Communications Server 2007 VoIP System:** run your phone system through our datacenter
- » **Hosted Exchange Server 2010:** all the benefits of Exchange 2007, plus email archival and discovery
- » **Hosted SharePoint 2007:** accessibility and security for your document storage
- » **Hosted ERP:** your company's financial data, backed up nightly in our datacenter

EXAMPLE VIRTUAL OFFICE SETUPS

Virtual Office Hosting for Mid-Market Companies

- » **Microsoft Windows Server 2008 (including Active Directory)**
- » **Exchange Server 2010**
- » **Office Communications Server 2007**
- » **SharePoint 2007 and/or Hosted ERP**

Virtual Office Hosting for Small Business Companies

- » **Microsoft Small Business Server 2008 (includes SharePoint, Active Directory, and Exchange 2007)**
- » **Office Communications Server 2007**

BENEFITS

- » **We Handle Security For You.** Our datacenter employs 3 layers of protection over all our clients' servers.
- » **Access from Anywhere.** Hosted software is accessible from any location (not just the office) with your login.
- » **"Green" Power Savings.** "Going hosted" eliminates the power & hardware costs you would have had.
- » **Daily Backups.** Our backup routines run daily. Every new server is automatically included.
- » **Support for Your Office.** PlanetMagpie's engineers will gladly assist you on any local or remote user issues.
- » **High ROI.** Save on in-house IT support, avoid having to buy expensive servers, and enjoy reduced prices on software licensing.
