IT CONSULTING SERVICES

Expert Help When Needed: High-End Strategic and Tactical Partners

There are two types of outsourcing: **Strategic and Tactical**. PlanetMagpie has been operating as both a Strategic and a Tactical partner to California businesses for over 12 years.

PlanetMagpie Strategic Resources: Our consultants architect and implement the latest Microsoft technologies to bring your company better functionality, reliability, and enhanced security. With expertise gained by working in many unique network environments, we offer a breadth of experience that ensures a successful project outcome.

PlanetMagpie Tactical Resources: As a Gold-Certified Partner, we maintain ten Microsoft Competencies. Our fully-certified team delivers additional IT resources for timely implementation of your new systems.

PlanetMagpie's Microsoft Competency Specializations

Microsoft

- » **Information Worker Solutions Competency** — Office Deployment of Microsoft Office 2007 and Microsoft Exchange Server 2007 and 2010
- » **Security Solutions Competency** — Identity and Secure Access Specialization for Security Management and Infrastructure Security for Networks
- » **Networking Infrastructure Solutions Competency** — Implementation of Microsoft Windows Server 2008 and Small Business Server 2008
- » **SOA and Business Process Competency** — Rollout of Office Communications Server 2007 with A/V Gateway
- » **Server Platform Competency** — Rollout of Windows Server 2008 with Hyper-V and Active Directory
- » **Systems Management Competency** — Deploy System Center with Operations Manager, Virtual Machine Manager and Data Protection Manager 2007
- » **Desktop Platform Competency** — Deploy and Configure Windows Vista and Windows 7 clients
- » **Business Intelligence Competency** — Designing a BI Infrastructure using Office SharePoint Server 2007 and SQL Server 2005/2008
- » **Data Management Solutions Competency** — Build data solutions with Windows Server, SQL Server and Office tools that provide critical business insight
- » **Small Business Specialists** — Network Solutions for Start-Ups and Small Business

EXAMPLES OF RECENT IT CONSULTING PROJECTS

- » Implementation of a new Network with Exchange 2010, Active Directory, File Server, and TS Web on Windows 2008 R2 — including the migration of the old domain, files and Exchange 2003
- » Building a hosted Office Communications Server 2007 infrastructure with VoIP for a client with multi-state offices
- » Employing Hyper-V to virtualize 43 servers down to 8, resulting in significant power savings
- » Assisting multiple clients with transferring entire network infrastructures to new office locations
- » Restoring 80% of a client's lost data when all their servers crashed with no reliable backups
- » Implementation of Data Protection Manager 2007 for on-site backups of an entire datacenter

BENEFITS

- » No sooner is a new software version or product released than it's implemented for use in PlanetMagpie's offices. You will never be our beta test, and you won't pay for our learning curve.
- » We offered cloud computing before it was even *called* cloud computing.
- » Our Gold Partner status allows us to work closely with high-level Microsoft support resources to ensure the smooth implementation of their software in out-of-the-ordinary environments.
- » Our founder was around when the AS400 was popular technology. Now we're working with Hyper-V, Data Protection Manager, Exchange Server 2010, SharePoint Server 2007, SQL 2008, Unified Communications, Office Communications Server R2 2007, and the Microsoft Small Business series. With experience dating back 25 years, we can handle anything—because we know the building blocks that got us here.
- » We can install your servers on-site, or host them in our datacenter. Few consulting companies maintain their own datacenters and have the expertise to build them at your location.
